#### Disrupting the status quo in residential building design.

Each floorplan was analyzed to balance space, organization and square footage to determine the optimal layout for day- and night time use and more social or private settings.

# CHALLENGING THE COMMONLY ACCEPTED TO CREATE THE EXCEPTIONAL AND INNOVATIVE.

Traditional design and development processes in the US where each aspect – architecture, interior design, landscaping, product design and engineering – are treated separately and in a linear fashion, can create discordant results.

The Total Concept Design™ process used for The Residences was holistic and concurrent, with continuous interplay between experts to craft a finely interwoven symphony. The result is a sense of harmony and unity between architecture, landscape, nature and the resident.

It's a completely different approach. It's not a definition of style, it's more a definition of the quality, how you use the space, how you use the object.
